

EZKLEAN:

EZKLEAN® casing cleaner is used during the displacement of oil-based and water-based drilling fluids. Typically, EZKLEAN® casing cleaner is used for surface cleaning operation and as the final pill in a displacement squeeze. Its function is to emulsify residual oil, remove polar and leave surface water wet.

Applications/Functions

- Casing cleaner
- Remove oil-based drilling fluids residues from surface

Advantages

- Improved casing wash performance helps reduce clean up time
- Environmental friendly product

Typical Properties

- Appearance: Clear Liquid
- Specific gravity: 1.0
- pH (10% in water): 7

Recommended Treatment

- A typical treatment range is 20% by volume in brine or seawater

Package

- 55 GAL DRUM
